WE ARE COMMITTED TO PEOPLE, THE ENVIRONMENT AND OUR COMMUNITIES

We want everyone today and future generations to enjoy swimming and water sports.

At arena we all share a passion for sports and life in and around water, our most abundant natural element. This passion inspires us to work together to continuously address the impact that our activity has on people and on our planet in order to help build a better future for our employees, partners, customers as well as the environment.

OUR COMMITMENT TO PEOPLE

- We design our products to inspire people to play sports and to stay active, challenge themselves and move toward the best version of themselves: healthier and connected to nature.
- We design quality, long lasting products so consumers don't need to replace them too often, creating less waste for the environment.

OUR COMMITMENT TO MOTHER NATURE

- Every day we challenge ourselves on how to develop products without harming the environment.
- We choose partners who share our values and, like ourselves, invest in both the planet and its people.

OUR COMMITMENT TO THE COMMUNITY

- We support local communities and promote sports through sponsorship and collaboration with national sports federations, sports teams, and international governing bodies.
- We provide equal employment opportunities and equal treatment for all our employees in the world.

BUILDING A BETTER FUTURE TOGETHER

Since embarking on our sustainability journey, we have been working towards providing customers with a racing range that is more environmentally conscious.

Beginning with the fabric itself, we have been committed to finding sustainable hydrophobic treatments which provide the same high-level quality and performance that our athletes are accustomed to.

OUR RESPONSABILITY JOURNEY

In terms of the design of our product packaging, we are working to gradually eliminate single-use plastics. We are proud to announce that by November of 2022 all our racing packages are plastic-free.

To help combat the negative effect of forest degradation, all hangtags and paper used for the packaging of both swimsuit and wetsuit products are FSC® certified. The FSC logo present on our packaging ensures that they have been made in compliance with rigorous environmental, social and economic standards, which aim to protect the world's forests and the ecosystems that depend on them, respecting local communities and the rights of workers.

This year arena is also proud to introduce the first ever sustainable racing suit that uses a more sustainable alternative to nylon, made from recycled products which

guarantees a lowered environmental impact.

Aside from these exciting initiatives within our product design and packaging spheres, our supply chain ensures a lowered need for transportation thanks to the proximity of our facilities and those of our fabric suppliers. Located in the middle of the European industrial productive pole, their location means less damage to our planet.

We also believe in recycling leftover pieces while cutting the fabrics needed to create our suits. We give a second life to these scraps by using them for colourful detailing on our bags.

Our 'Wetsuit upcycling' project is part of our broader outlook on creative reuse. We turn wetsuits that are at the end of their lifecycle into entirely new products such as laptop and

The mark of
responsible forestry

smartphone cases, bottle holders, and small pouches.

We are constantly being intentional in the way that we design, produce, and recycle our products, and will continue to commit ourselves to the development of our sustainability journey.

SUPPORTING NATIONAL FEDERATIONS AND TOP ATHLETES

“Since 1973, arena has prioritized strong connections with the most important swimming and watersports federations around the world, from grass roots to Olympic and Paralympic support.

National Federations play a critical and active role in the development of both amateur and elite watersports. We share their goal to grow watersports, increasing inclusivity and diversity and using sport as a driver for social wellbeing. We share their commitment to make the water accessible for people to relax, train and compete.

At the heart of the arena brand are its athletes, who are both key collaborators in the product development cycle and important ambassadors for the brand, upholding its values and expressing its authenticity.

Since Mark Spitz first teamed up with Horst Dassler in 1973, arena's progression to the top of its field has always occurred in partnership with world class swimmers, whose voices are not only emblematic of the brand's emphasis on quality, they're also an inspiration for many, from the amateur who goes to the pool to stay

fit and lead a healthy lifestyle, to those that mount the Olympic podium, and not least the backroom staff who have helped craft and live the entity that arena has proudly become.

An Olympic cycle has just ended and arena has decided to renew its sponsored team by trusting young champions but still relying on the brand's emblematic Ambassadors such as Sarah Sjöström, Gregorio Paltrinieri, Florent Manaudou, Chad Le Clos, Cate Campbell, Florian Wellbrock, Kristof Milak and Bruno Fratus. By starting a collaboration with Lydia Jacobi, David Popovici, Kyle Chalmers, Louise Hansson, Thomas Ceccon and Noè Ponti, arena is chasing Olympic Gold in Paris and opens up new perspectives for the next main events. This mix of experience and freshness allows the brand to consolidate its innovation, its authenticity and its passion thanks to young people who are making arena progress day after day. The arena team will have more than 30 Champions to shine on the international podiums in the next 3 years.”

POWERSKIN

DESIGNED WITH THE ELITE ATHLETES IN MIND

Powerskin is the benchmark for high performance gear, designed for all levels of competitions, achieved through years of research and testing.

Top athletes, sports scientists, swim coaches and industry experts are deeply involved in the development of its cutting-edge technologies, leading to podium performances around the world.

Powerskin stands for innovative materials and construction methods that reduce drag and enhance swimmers speed and efficiency, while delivering comfort and durability.

Every piece is the product of technological R&D that draws on an extensive international network of excellence and close collaboration with the world's leading athletes who provide invaluable insight throughout the development cycle.

POOL SWIMMING

THE POWER OF THE CARBON FIBER.

Flexibility, compression, durability. Together at last.

CARBON FIBER: THE SECRET BEHIND UNCOMPROMISING COMPRESSION AND FLEXIBILITY.

One fiber of carbon is 10 times stronger than steel and 80% lighter. That's why the Carbon Fiber is the ultimate material for performance and speed in everything from F1 cars to space shuttles. Following years of extensive research and development, arena has discovered a revolutionary way to integrate flexible strands of this extraordinary material into the fabric of all Carbon Series race suits, delivering unprecedented performance and strength without sacrificing flexibility and range of motion.

THE CARBON FIBER EFFECT IN A RACE SUIT

NORMAL FABRIC	 CARBON FIBER FABRIC
<p>The compression is achieved by stretching the fabric to its limit.</p>  <p>Movements blocked.</p>	<p>The carbon provides compression at a lower limit of stretch, before breaking down the fabric.</p>  <p>The stretch in reserve provides FLEXIBILITY AND FREEDOM OF MOVEMENT.</p>
<p>AFTER SOME USE</p>  <p>After some use the elastic fiber loses its form and the compression.</p>	<p>AFTER SOME USE</p>  <p>Thanks to the SHAPE-MEMORY of the carbon, the suits gets back to its original form.</p>

EVERLASTING COMPRESSION. UNPARALLELED RANGE OF MOTION.

BENEFITS OF THE CARBON FIBER:

FLEXIBILITY HIGH COMPRESSION

Carbon Fiber Technology compresses muscles with minimal fabric stretching. That leaves extra elasticity for excellent mobility while providing powerful compression to strategic muscles groups.

DURABILITY

10 times stronger than steel, chlorine resistant and with shape-memory, Carbon Fiber is a powerful material with extraordinary qualities. Tech suits made from this fabric are highly resilient and are not altered by use in pool water for a longer-lasting lifespan.

HOW TO TAKE MEASUREMENTS (VALID FOR ALL POWERSKIN RACING SECTION)

- A - Chest:** Take the measurement over the fullest part of your bust.

B - Waist: Measure around the narrowest part of your waistline.
- C - Hips:** Measure around the fullest part of your hips.

D - Torso loop: In a loop, measure from the highest part of the shoulder, beneath the crotch and then back to the starting point.

(**) Body measurements and corresponding sizes are to be considered as a general guideline. We strongly recommend that any racing suit should be tried on by each swimmer before choosing the appropriate size, based upon individual preference in terms of compression. Swimming stroke and distance may also be key factors in the suit selection.

**GREATER
FLEXIBILITY**

MEET THE WETSUIT THAT IS FITTED WITH
CORE TECHNOLOGIES TO PROVIDE THE
BEST MIX OF BUOYANCY, FLEXIBILITY,
THERMAL PROTECTION AND COMFORT.

The POWERSKIN THUNDER was conceived in an effort to understand the essence of what open water swimming beginners need from a wetsuit. We utilized our proven legacy and experience in the sport to provide novices with a clear-cut solution to their racing needs. Equipped with all the essentials, it is made entirely from eco-friendly, durable Yamamoto limestone neoprene and coated with Nano SCS for an efficient glide through the water.

The distribution of neoprene density minimizes resistance during the swimmer's stroke, and provides buoyancy in all the right areas for an optimal body position. The thickest 4mm layer is placed within the core for added stability, while the upper chest and legs are supported with a lighter layer of 3mm neoprene for thermal protection. The shoulders and arms experience greater freedom of movement thanks to the 2mm neoprene thickness coverage.
